

The Last of Us — My Favourite Video Game

1. Introduction

Слайд 1

Hello everyone.

My name is **Andrew**, and I am a student.

Today I would like to talk about my favourite computer game

Слайд 2

...

Слайд 3

— **The Last of Us**. I mean both parts: *The Last of Us Part I* and *The Last of Us Part II*.

I played both games on PC, one after another. Before that, I bought myself a new graphics card for my birthday, and after that I started playing more single-player story games. *The Last of Us* was not the first game I played, but it became my favourite.

For me, this game is not just a shooter or a survival game. It feels like an interactive movie. You do not only watch the story — you control the characters and become part of this world.

2. Basic information

Слайд 4

The Last of Us was developed by **Naughty Dog** and published by **Sony Interactive Entertainment**.

The genre is **action-adventure** with elements of **survival**, **stealth** and drama. Some moments can be scary, but I would not call it a horror game. It is more about atmosphere, tension, survival and emotions.

The story takes place in a post-apocalyptic world. A dangerous infection has destroyed normal life, and many people have turned into infected creatures. But the game is not only about monsters. It is also about people, their choices, relationships and difficult situations.

3. Story and characters

Слайд 5

The main characters of the first part are **Joel** and **Ellie**.

Joel is an experienced survivor. He is careful, strong and closed emotionally. Ellie is a young girl who is brave, emotional and important to the whole story.

Слайд 6

The first game is about their journey through a dangerous world. They travel through abandoned cities, buildings and other locations. During this journey, their relationship becomes stronger, and this is one of the best parts of the game.

The second part continues the story and makes it bigger and more complex. There are new characters, new locations, new weapons and new abilities. At first, some story decisions may seem strange. For example, you do not immediately understand why another heroine is so important. But later the game becomes much deeper and more interesting.

I do not want to give spoilers, so I will only say that both parts feel like one big story. For me, they are not just two separate games. They are one complete emotional experience.

4. Gameplay and progress

The gameplay is one of the reasons why I like this game so much.

Слайд 7

The player explores different locations, collects resources, fights enemies and improves weapons and skills. There is no usual currency like coins or gold. The most important things are **ammo, resources, weapon parts and supplements**. You need them to craft items and upgrade your character.

Слайд 8

The resources are limited, so you cannot waste everything. Every bullet can be important. That is why the game makes you think before every fight.

I played on one of the highest difficulty levels, but not on the hardest one. The hardest difficulty is called **Grounded mode**, and there every bullet really matters. I prefer to enjoy the story, atmosphere and gameplay rather than suffer too much, so I chose a difficult but still comfortable level.

To make progress, you complete story missions, explore locations, find loot, craft useful items and upgrade your skills. I especially liked the talent system, because it makes the game more interesting and gives you a feeling of development.

5. Combat and enemies

Слайд 9

Combat in *The Last of Us* is very tense. I like that you can complete fights in different ways. You can shoot, use stealth, distract enemies, throw bottles or bricks, set traps and use crafted items.

Слайд 10

Personally, I really liked stealth and one-shot mechanics. I often tried to silently kill as many enemies as possible first, and only then start shooting if something went wrong. This is useful because the game does not give you too much ammo.

Against infected enemies, stealth is very satisfying. Against human enemies, I usually had to shoot more often, because they are smarter, hide behind cover and attack from different sides.

Слайд 11

The most memorable enemy for me is the **clicker**. It is one of the classic infected creatures. Clickers make special clicking sounds, and they are very dangerous. They can suddenly appear and make you jump. But at the same time, it is really cool to kill them quietly.

Слайд 12

There are also stronger infected enemies, like **shamblers** and **bloaters**. They are much bigger and more dangerous. When you fight them, it feels scary because one strong hit can almost kill you. You have to move carefully, use your weapons wisely and not panic.

In the second part, the combat became even better. There are new weapons, new abilities and more variety. For example, there are semi-automatic and automatic weapons, and they make fights more dynamic.

6. Graphics, atmosphere and locations

Слайд 13

The atmosphere of *The Last of Us* is incredible.

The game has beautiful graphics, especially on a good PC. Character faces, animations, light, details and locations look very realistic. Sometimes I just wanted to stop and look around.

The locations are also very atmospheric. There are abandoned cities, overgrown streets, destroyed buildings, dark rooms and dangerous areas. In the second part, the world feels even more varied. It is not only one type of location; the game shows different places and different moods.

I like how the game mixes beauty and danger. On one side, the world is destroyed and sad. On the other side, it can look very beautiful because nature has taken over cities.

7. Why I like this game

Слайд 14

I like *The Last of Us* because it combines everything I enjoy in games.

It has an interesting story, strong characters, beautiful graphics, tense combat and amazing atmosphere. It also has many plot twists and emotional moments, but without feeling like a simple action movie.

The most important thing for me is that the game feels alive. You believe in the characters, you care about them, and you want to know what will happen next.

The first part is amazing as a game and as a story. The second part improves many things: gameplay, weapons, talents, locations and the way the story is told. That is why I cannot choose only one part. I think both games work best together.

8. Who can enjoy this game?

Слайд 15

I think *The Last of Us* is perfect for people who like story-based games, survival mechanics and cinematic experiences.

It can also be interesting for players who like stealth, tactical combat and emotional stories. But it is probably not for everyone, because the game is serious, violent and sometimes dark.

I would recommend it to people who want not just to play, but also to feel something and think about the story.

9. Conclusion

Слайд 16

To sum up, *The Last of Us Part I* and *The Last of Us Part II* are my favourite games because they feel like one big, impressive and beautiful story.

For me, this game is more than entertainment. It is an experience. It has great gameplay, memorable enemies, strong characters and a world that is both dangerous and beautiful.

That is why I think *The Last of Us* is one of the best examples of how video games can be close to cinema and art.

Thank you for your attention.
